

# IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

## Monitoring Requirements Not Met for Paw Paw Water Works WV3303308

Our water system violated drinking water monitoring requirements within the past year. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation. We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

### What should I do?

There is nothing you need to do at this time.

The table below lists the monitoring we did not conduct, how often we are supposed to sample and when the samples should have been taken.

Required Monitoring	Required Monitoring Frequency	Compliance Period
Revised Total Coliform Rule Total Coliform Sample (Type 3A)	Monthly	02/01/2020 to 02/29/2020
Monthly Operation Report (MOR) Chlorine (Type 27)	Monthly	02/01/2020 to 02/29/2020
Failure to Monitor or Report Radionuclides (Type 03)	6-years	01/01/2014 to 12/31/2019
MOR Chlorine (Type 36)	Monthly	02/01/2020 to 02/29/2020

### What happened? What is being done? (Describe corrective action)

Total Coliform Sample, Compliance Period 1 Feb 2020 to 29 Feb 2020 was collected but not sent to the state by the due date. Chlorine, compliance Period 1 Feb 2020 to 29 Feb 2020 was collected and written on our MORs, however some samples were left of the digital copy sent to the state. Radionuclides, 1 Jan 2014 to 31 Jan 2019 were not on the report sent to the state. We are keeping a closer eye on samples that need to be collected & sent to the state on time.
